Research Experiences for Teachers in Robotics

Cognitive Computing and Machine Intelligence Laboratory (CCMIL)
Texas A&M University–Corpus Christi

- 2+ week summer research experience
- 10 school math/science teachers per week
- 2 teachers per school
- No stipend provided

- Conduct robotics research in partnership with graduate students, and faculty
- Area of research include robotics, image processing, mobile programming and control

- Support the development of modules/lessons connected to curriculum
- Complete engineering research coursework
- Hands-on experience on robotics design, control and agent.
