SECTION I. COASTAL AND MARINE SYSTEM SCIENCE PROGRAM

The Purpose of this Handbook
This handbook is a companion for the catalog of your year of entry: http://www.tamucc.edu/academics and in case of any contradiction the catalog of record is the true source of information. The Graduate Studies handbook provides university-wide information relative to student resources, academic policies, financial assistance, graduation and thesis guidelines http://gradcollege.tamucc.edu/current_students/masters_students.html.

The section on the thesis proposal in this handbook is particularly important because it is not covered in the Graduate Studies Handbook but is essential in understanding the path to graduation with a Master’s Degree in Coastal and Marine System Science.

Program Mission
The mission of the Master of Science program in Coastal and Marine System Science (CMSS) is to support interdisciplinary research and scholarship on the biotic and abiotic components of coastal and marine zones, including quantitative investigation of socio-economic and political processes. The program addresses this mission by integrating the tools of Earth System Science: biogeochemistry, geographic information science, ecosystem dynamics, and quantitative modeling.

Student Learning Outcomes
Students will:
- Acquire the skills required for system science studies applied to coastal and marine topics such that they are prepared to conduct CMSS original research
- Perform original and hypothesis-driven quantitative analyses that will lead to comprehensive verifiable models of natural systems
- Emphasize mathematical and/or analytical skills to generate new data and critically evaluate models that will aid in our understanding of dynamic natural systems, become a resource capable of answering environmental “what if” questions by providing comprehensive interpretation
- Develop the skills necessary to present and publish their work at national and international venues
- Develop a skill set and research record such that they can secure employment in universities, federal agencies, private companies or non-governmental organizations where they can apply the skills and knowledge acquired during the program

This handbook is intended to be read in conjunction with the Graduate Catalog: [http://catalog.tamucc.edu/index.php](http://catalog.tamucc.edu/index.php) and the College of Graduate Studies Handbook [http://gradcollege.tamucc.edu/current_students/masters_students.html](http://gradcollege.tamucc.edu/current_students/masters_students.html).
SECTION II. ADMISSION INFORMATION

Program Admission Requirements
Applicants seeking admission to the CMSS Program must apply through the University’s College of Graduate Studies (CGS). In addition to the documents required by CGS, applicants must submit GRE general test scores, an essay of no more than 1,000 words describing their educational background, career interests, goals and challenges, a curriculum vitae, and three letters of evaluation from persons knowledgeable about their potential for success in graduate studies. Applicants seeking admission to the MS Program in CMSS should first contact the program faculty and identify a faculty member willing to serve as the graduate advisor. Applicants will not be admitted to the program without a graduate advisor. Applicants may optionally submit other relevant materials, e.g., copies of published works or reports of past scientific research, if any. All materials submitted will be considered. A campus visit with personal interviews involving prospective faculty mentors is highly recommended. Completed applications must be received by the College of Graduate Studies by the deadlines posted on the CGS website. Incomplete applications are not considered. The applicant will be notified of acceptance or rejection by letter.

Students accepted into the CMSS MS program must demonstrate proficiency in the natural sciences, mathematical modeling, and geospatial technology. This proficiency can be demonstrated by the successful completion of undergraduate classes in these topics, or by presentation of satisfactory evidence to the CMSS Program Coordinator. Students who are unable to demonstrate proficiency in the natural sciences, mathematics, or geospatial technology may be required to take undergraduate or graduate courses in these areas. These courses will not count toward the coursework required for the MS degree.

Application Deadlines
The CMSS program has two types of application deadlines: 1) priority deadlines and 2) last decision date deadlines. All students should strive to meet the priority deadline because it is used to make decisions regarding funding of assistantships. All applications after the priority deadline are considered “late” applications. CMSS program deadlines are earlier for international students because of the time required to process visa applications for international students.

The acceptance process has two steps: 1) vote for acceptance by the CMSS faculty, and 2) final and official acceptance by the College of Graduate Studies. The applicant will be notified of his/her acceptance or rejection by the College of Graduate Studies.

Assistantships

Students seeking full consideration for graduate assistantships should have a completed application file submitted by the Priority Deadline of February 1 (Fall admission only). However, applicants must apply separately for scholarships and assistantships at the College website: http://sci.tamucc.edu/students/gradfunding.html.

After the priority deadline, any awards will be made on a first come, first served basis. Students who have received offers for assistantships must notify the CMSS Program Coordinator (Xinping Hu) and the College of S&E Dean’s office of their acceptance within one week of receiving the offer letter. Otherwise, the University will assume that the offer has been rejected and will make offers to other deserving students.

Admission to the program is decided independently of financial awards. Students must first be accepted into the program before financial awards can be considered. For details regarding graduate assistantships, refer to the CGS Graduate Assistantship Handbook at: http://gradschool.tamucc.edu/funding/assets/Graduate_Assistantship_Handbook.pdf.

CMSS Assistantships

Teaching Assistantships
Teaching assistantships are available each year through the College of Science and Engineering; see http://sci.tamucc.edu/students/gradfunding.html.

The State of Texas requires international graduate students whose native language is not English to obtain English proficiency certification before serving as graduate teaching assistants. See CGS Graduate Assistantship Handbook for details.

Research Assistantships
A limited number of research assistantships are available through research institutes or centers, and individual faculty members; consult with the institute or center directors and individual faculty members to identify these funding sources. Some graduate research assistantships are administered through the College of Science & Engineering; see http://sci.tamucc.edu/index.html (select “Student Information”).

Harte Research Fellowships
A limited number of Fellowships may be available through the Harte Research Institute for Gulf of Mexico Studies (HRI). These fellowships are for students working with the HRI Endowed Chairs in the Institute. Application is made directly with an HRI Endowed Chair.

This handbook is intended to be read in conjunction with the Graduate Catalog: http://catalog.tamucc.edu/index.php and the College of Graduate Studies Handbook http://gradcollege.tamucc.edu/current_students/masters_students.html.
Eligibility
All students who hold assistantships must be enrolled as full-time students (at least 9 graduate hours during the fall and spring semesters, and 3 hours during the combined summer session) in the CMSS program. Appointments are for two full semesters (fall and spring). Reappointment requires reapplication each year, and students should not assume that the appointment will continue automatically. Summer assistantships may be available but must be applied for separately. Check the CGS website for additional funding opportunities http://gradschool.tamucc.edu/fundinginfo.html

Amount
Currently, master’s students are paid $1,200/month.

Out-of-State Tuition Waiver
Graduate assistants are eligible for a tuition waiver that reduces tuition to Texas Resident rates. However, this must be applied for each semester and a student must work in a half-time (20 hrs/week) position and be enrolled in 9 credit hours during fall and spring semesters and 3 credit hours during the summer to be eligible for the waiver. To apply for the waiver, visit the College of Graduate Studies website: http://gradschool.tamucc.edu/funding/assistantships.html#teaching

Cost of Education
Graduate education can be expensive and many students may want to estimate their financial commitment. The College of Graduate Studies has information available so that students can estimate the cost of attendance. Visit this website: http://gradschool.tamucc.edu//funding/cost_of_attendance.html

New Student Orientation
A New Student Orientation Session is offered every Fall and Spring semester as part of the Graduate Student Orientation. For additional information on this event please visit http://gradschool.tamucc.edu/current_students/orientation.html.

Topics covered during the session include:
- The College of Graduate Studies
- The Big Picture of Graduate Degrees
- Getting to the Master’s Degree
- University and Program requirements

SECTION III. ACADEMIC PROGRESSION

Program Degree Requirements
Each student admitted to the MS in Coastal and Marine System Science degree program must complete a minimum of 36 hours beyond the bachelor's degree (at the 5000- or 6000-level). A student's advisory committee must approve the degree plan. All students must successfully complete at least nine semester credit hours per long semester to remain in the program. All
students must pass a final thesis defense, to be administered by their advisory committee, during their last semester before graduation.

The program normally requires a minimum of 18 credit hours of regular graded coursework. Justification for exceptions to this rule should be prepared by the student and advisor(s), endorsed by the advisory committee, and attached to the degree plan when submitted for the department head's signature.

**Core: Required Courses (12 semester credit hours)**

1. CMSS 5392 Thesis I: Thesis Proposal
2. CMSS 5393 Thesis II: Thesis Research
3. CMSS 5394 Thesis III: Thesis Submission
4. CMSS 6102 Seminar in Coastal and Marine System Science
5. ESCI 5203 Professional Skills for Scientists

**Core: Course Choices (12 semester credit hours)**

Choose four courses (12 sem. hrs.) from the list below:

1. CMSS 6303 Natural Systems Analysis
2. CMSS 6305 Natural Systems Modeling
3. CMSS 6307 Coastal and Marine Systems
4. CMSS 6330 Geospatial Analysis
5. CMSS 6370 Coastal Management and Ocean Law

**Elective, Specialized and Topical Courses (12 semester credit hours)**

Elective coursework (12 sem. hrs.) supporting the student's individual research goals is chosen from biology, chemistry, coastal and marine system science, computer science, environmental science, geographic information science, geology, math, marine biology, public policy, socioeconomics, or other course offerings, in consultation with student's advisory committee. These include Advanced Topics, Directed Independent Studies and Thesis Project Research.

Topical coursework should be approved by the graduate advisory committee, and is offered under the heading of:

CMSS 6590 Advanced Topics

Students can also enroll in a Directed Independent Study, supervised by their advisor or other faculty members, at any stage of the program progression:

CMSS 5596 Directed Independent Study

Students may also enroll in CMSS 5940 - Thesis Project Research (1-9 sem. hrs.) to conduct research related to the CMSS M.S. thesis project. Up to six hours may count as credit toward
regular graded (non-research, non-variable credit) elective coursework for the M.S. degree requirement in Coastal and Marine System Science.

CMSS 5940 Thesis Project Research

The remainder of classes or research projects designated as part of the elective coursework requirement must receive the approval of a student's graduate advisory committee. Students must demonstrate to the committee that the selection of classes or research projects produces a coherent course of study focused on the student's particular area of emphasis. Depending on the emphasis area, selections may include coastal and marine system science, marine biology, the natural sciences, computer science, geographic information science, mathematics, political science, public administration, business law, or other areas as stipulated by the graduate advisory committee.

**Thesis Information**

*Thesis Course Series*

*Thesis Format, Style, and Submission*

The thesis must be prepared in a format and style prescribed by the advisory committee. Guidance can be found in the College of Graduate Studies.

Upon approval by the student's graduate advisory committee, a copy of the thesis will be submitted to the College of Graduate Studies. For more information, see the [Master’s Student Handbook](http://gradcollege.tamucc.edu/current_students/masters_students.html), available from the College of Graduate Studies.

*Final Thesis Defense*

Each student must pass a final thesis defense examination during the last semester before graduation, to be administered by the student's graduate advisory committee. The exam will cover topics related to (1) all graduate coursework undertaken for the CMSS program, (2) the student's thesis research area, and (3) broad concepts of system science, requiring familiarity with the literature and appropriate professional societies. The student is responsible for scheduling the defense in consultation with the graduate advisory committee. A student who fails the defense may repeat it once, but only after an interval of four months or more. If a student fails the second defense, he or she will be terminated from the program. Students must enroll in the course CMSS 5394 Thesis III: Thesis Submission during the semester in which they are planning to defend the thesis and/or graduate.

**Graduate Advisory Committee**

The purpose of the graduate advisory committee is to provide guidance and technical advice from a diverse viewpoint throughout the student’s research experience. The committee chair (typically the graduate advisor) is the principal source of research guidance. The other members of the committee are selected by the student and should be chosen to provide complementary expertise to
that of the committee chair. All committee members must have graduate faculty status at TAMUCC.

The chair is selected at the start of the student’s **first semester**, and the full committee must be selected within the **first two long semesters**. The graduate advisory committee consists of at least three CMSS members (http://sci.tamucc.edu/member.php?who=all&program=cmss), including the committee chair. Additional members from outside the CMSS faculty may be approved by the College of Graduate Studies (CGS). In exceptional cases, individuals holding graduate faculty rank at TAMU-CC or another accredited institution may serve as co-chair with the unanimous approval of the CMSS faculty on the committee. In all cases involving the appointment of a non-CMSS Ph.D. faculty member, a graduate faculty status request accompanied by a curriculum vitae and a rationale for the appointment must be filed with the CGS and provided to the CMSS Program Coordinator. The advisory committee must be documented with Form A: Thesis Advisory Committee Appointment Form. Any changes to the committee require that Form D: Thesis Committee Member Change Request form, which is also filed with the College of Graduate Studies.

Together, the graduate advisory committee and the student prepare a degree plan detailing the coursework necessary for the student’s program of study, select a thesis topic and formulate a research plan. The graduate advisory committee also approves the thesis proposal and final manuscript, and final thesis defense/oral examination. Signed copies of the degree plan must be sent to the College of Science and Engineering Dean’s Office (Academic Advisor) and the College of Graduate Studies by end of the **second long semester**.

Composition and size of the graduate advisory committee should reflect the scope of the intended graduate program and should be developed with substantial input from the student's primary advisor(s). After the committee is formed, the primary advisor will normally become the committee chair. Individual faculty members are under no obligation to serve on a committee or to be the committee chair. The decision not to serve should be based on some definable criteria such as work overload or incompatible research interests.

The advisory committee chair supervises the student’s thesis research, including preparation of the thesis manuscript. The committee as a whole approves the degree plan, research proposal, thesis manuscript and final thesis defense/oral examination. Beyond these functions, the chair and advisory committee members should serve as valuable mentors.

If possible, students should meet with their committee by the end of the **first long semester** but no later than the end of the **second long semester**. The goal of the first committee meeting is to allow students to introduce themselves and their academic and research interests to the committee and to finalize a degree plan. Students should remain in close contact with their graduate advisory committee during all phases of graduate study and thesis research to keep them informed of progress and setbacks. At least annually, students must meet with their advisory committee to update the committee regardless of progress.
Students are responsible for calling required annual meetings of the committee and any other meetings deemed necessary by either the student or a committee member. The student is responsible for maintaining a written record of advisory committee meetings including conclusions reached. The student also submits all necessary paperwork and reports from the graduate advisory committee to the CMSS Administrative Assistant. Copies of meeting notes will be placed in your program file by the CMSS Administrative Assistant.

Preliminary drafts of the thesis are typically reviewed by the committee chair. The final draft of the written product is presented to the full committee for comments and/or changes before it is submitted. The final approval of the thesis occurs at the final oral examination (described further below).

**Degree Plan**
The degree plan will be administered by the academic advisor. The degree plan must be completed within the first 18 semester hours (two long semesters) and must be signed by all committee members.

After the graduate advisory committee approves the degree plan, it must be filed with the College of Science and Engineering CMSS Academic Advisor, CMSS Program Administrative Assistant, and CGS. After a tentative degree plan is finalized, the graduate advisory committee and CGS must approve any changes or elective coursework if the courses are to be applied to the total semester hours required for the degree. Exception forms to document these changes can be found at [http://gradschool.tamucc.edu/forms.html](http://gradschool.tamucc.edu/forms.html) (Form I). Prior to graduation, your Committee Chair will circulate a final degree plan that includes any approved changes from the tentative degree plan to the student, advisory committee, College Dean, and Graduate Dean for final approval.

**Seminar Classes**
All students in residence are required to complete 1 hour of CMSS 6102 (Seminar in Coastal and Marine System Science) and 2 hours of ESCI 5203 (Professional Skills for Scientists) as part of the CMSS Core Curriculum. Note CMSS 6102 is usually offered in fall and ESCI 5203 is offered in spring.

**Culminating Event/Exit Requirements**
The culminating event is the final oral examination, also known as the Final Defense. Grades for the final course, CMSS 5394 Thesis Submission, will be entered only after all requirements have been met.

**Notification of Intent to Graduate**
Graduation upon completion of the course requirements is NOT automatic. The semester before graduation is anticipated, students should obtain an application from the Office of Admissions and Records by the deadline date indicated in the University Class Schedule. Deadline dates are also available on the Texas A&M University-Corpus Christi website.
SECTION IV. CMSS CORE CURRICULUM COURSE DESCRIPTIONS

These courses are to be taken by all CMSS MS Program students. See “Degree Requirements” above for details on the core curriculum. Elective courses are described in the Graduate Catalog.

CMSS 5392 3 sem. hrs. (3:0)  THESIS I: THESIS PROPOSAL
Thesis students must submit a completed proposal for their thesis project. A course section will be created for the student to enroll. Upon successful completion and submission of the proposal signed by the graduate committee of the student, students may then register for CMSS 5393 Thesis Research. Open only to M.S. Thesis Degree Candidates in CMSS.

CMSS 5393 3 sem. hrs. (3:0)  THESIS II: THESIS RESEARCH
Implementation of the Thesis Proposal, and the production of a rough draft of the thesis submitted to the graduate committee of the student for initial editing and comment. A course section will be created for the student to enroll. Prerequisite: CMSS 5392 - Thesis Proposal.

CMSS 5394 3 sem. hrs. (3:0)  THESIS III: THESIS SUBMISSION
Completion of the final draft of the thesis, signed by the graduate committee of the student and ready for binding and distribution. A course section will be created for the student to enroll. Prerequisite: CMSS 5393 Thesis Research. May be taken concurrently with CMSS 5393 Thesis Research.

CMSS 6102 1 sem. hr. (1:0)  SEMINAR IN COASTAL AND MARINE SYSTEM SCIENCE
Advanced topic study and presentation by students, faculty, or visiting scientists. Meets one hour weekly.

ESCI 5203 1 sem. hr. (2:0)  PROFESSIONAL SKILLS FOR SCIENTISTS
Presentation and discussion of professional skills of practicing scientists including literature searches, evaluation of information sources, oral and written communication skills, lifelong learning, careers and professional opportunities. Spring.

CMSS 6303 3 sem. hrs. (3:0)  SYSTEMS ANALYSIS
Statistical analysis for data collected in several variables. Topics include sampling from multivariate normal distribution, multivariate analysis of variance, discriminant analysis, principle components, and factor analysis. Prerequisite: Math 5315 Statistical Methods in Research I, undergraduate equivalent, or consent of instructor.

CMSS 6305 3 sem. hrs (3:0)  NATURAL SYSTEMS MODELING
Parameterization of natural systems through the identification and characterization of input/output pathways, regulators, and sinks. Construction, testing, and use of various types of models: conceptual, ecosystem, and numeric. Prerequisites: MATH 5315 Statistical Methods in Research I and MATH 5316 Statistical Methods in Research II, or permission of instructor.

CMSS 6307 3 sem. hrs. (3:0)  COASTAL AND MARINE SYSTEMS
Description of coastal and oceanic ecosystems to provide an overview of the fundamental concepts of the abiotic and biotic components, physical-chemical processes, and interactions with environmental and human systems.

CMSS 6330 3 sem. hrs. (3:0)  SPATIAL SYSTEMS SCIENCE
Introduction and advanced usages of mapping datums, coordinate systems, and accuracy requirements for geographic information systems (GIS). Use of GIS tools to investigate statistical patterns and relationships

This handbook is intended to be read in conjunction with the Graduate Catalog: http://catalog.tamucc.edu/index.php and the College of Graduate Studies Handbook http://gradcollege.tamucc.edu/current_students/masters_students.html.
among maps and geo-databases. Derivation of new maps and analysis based on spatial context, patterns, surface configuration, proximity, connectivity and flows. Prerequisites: MATH 5316 Statistical Methods in Research II; a working knowledge of ArcView and/or ArcGIS; or permission of instructor.

CMSS 6370. 3 sem. hrs. (3:0) COASTAL MANAGEMENT AND OCEAN LAW
Intensive study of the 1972 National Coastal Zone Management Act and subsequent coastal management programs. The Texas program, which is administered by the General Land Office, will be dealt with in depth as the central focus of the course. Statutory law relating to citizen, state, and federal rights and duties as they impact coastal and maritime law will be studied including applicable Texas real property law. Students will use case law studies relating to those rights and duties and Public Trust Doctrine cases to gain an integral part of understanding the responsibilities of governments and rights of citizens.

This handbook is intended to be read in conjunction with the Graduate Catalog: http://catalog.tamucc.edu/index.php and the College of Graduate Studies Handbook http://gradcollege.tamucc.edu/current_students/masters_students.html.
SECTION V. STEPS OF WORKING ON A THESIS

Your thesis must conform to CMSS program and College of Graduate Studies institutional standards. The following guidelines will help ensure your thesis is completed and submitted appropriately. Consult the CGS Master’s Student Handbook for specific formatting and submission requirements.

Research Prospectus/Proposal
The CMSS program strives to train all master’s students comprehensively including with knowledge in their professional fields as well as training in the methods of research. Students must conduct original research related to CMSS program goals. Many classes will require you to write research proposals and/or peer-reviewed publications as part of the graded class assignments.

The master’s student, along with the student’s graduate advisory committee, designs and plans the thesis research project. This plan should be formalized in a “Prospectus”, a brief two-page document summarizing the motivation, goals and methods of the student’s intended research project, as well as the expected benefits or outcomes. The Prospectus is a prologue to the formal Research Proposal and should be presented to the graduate advisory committee at an early meeting.

The Introduction to the Prospectus should briefly explain the area of interest and scholarly motivation for the research. One or a few clearly stated objectives should be listed. The Prospectus should conclude with an approach on how, where, and when the research will be accomplished. The Prospectus will be submitted, along with the degree plan, to the College of Science and Engineering Dean’s Office (Academic Advisor), no later than the end of the second long semester (fall/spring).

Structure of Research Proposal
The proposal should be concise and provide a compelling rationale for the proposed research. The proposal must include a brief but complete synthesis of previous research on the problem, the significance or novelty of the research, and a detailed plan (experimental protocol) for carrying out the research and eventual analysis of the results. The proposal must also include a timeline with distinct milestones to guide the student and the advisory committee in assessing progress, as well as the budget. The proposal should be approved by the advisory committee prior to substantial research.

The proposal should be prepared in the style of a relevant peer-reviewed journal. A thesis proposal must include the following sections, in this order:

1. Title page. See example of a correctly spaced and formatted title page below.
2. Project Summary. Like an abstract, the Summary should be a synopsis of the proposed activity suitable for publication and not more than one page in length. It should describe the activities of the project. The Summary must clearly address, in separate statements, the two merit review criteria that are used by national science programs: 1) the intellectual merit of the proposed activity; and 2) the broader impacts resulting from the proposed activity.
3. **Background & Relevance.** This section summarizes the available scientific literature related to the problem or topic and explains why the proposed research is necessary.

4. **Purpose, Objectives and Hypotheses.** This section explicitly states the purpose of the research project (e.g., to determine what effect sea-level rise has on oyster reef extent and morphology). The purpose should reflect the question(s) that the research hopes to answer, not the method used to conduct the research. The objectives provide the steps in the research (not explicit methods) that will be used to answer the question (e.g., to gather data on oyster reef extent and morphology in areas of rising sea level). Hypotheses provide the explicit questions and predictions that will be tested in order to answer the larger research question.

5. **Study site.** Optional. If field research is planned, then a description of the study area including a map should be included. The study site should be briefly characterized in terms of physical and/or biological attributes.

6. **Methods.** This section describes in detail the methods of data collection and analysis you will use to meet each research objective or hypothesis. This is arguably the most important part of the proposal. Be sure and include how and when you will obtain any necessary permits.

7. **Timeline.** The timeline should be a table that includes distinct milestones showing the schedule for both research and academic work. Milestones should include completion of coursework, preliminary examinations, data-gathering for each objective or hypothesis, and analysis of each objective or hypothesis, writing of thesis, submission to committee, and graduation.

8. **Budget.** The budget should reflect an accurate assessment of the expenses that will be incurred during the research project and by whom they will be paid. Include financial or other support obtained from all sources. Include each relevant item in the budget in the “Method” section of the proposal. Divide the budget into 4 subsections and present it in tabular form.
   a. **Equipment.** Include cost figures for each piece of non-expendable equipment that you must purchase to support your research. Do not include purchase costs for equipment already available for use at TAMU-CC, but make sure that such equipment is operational and available for your use. Obtain permission before using University equipment and expendables.
   b. **Expendables.** Estimate costs for all supplies, chemicals or other items to be exhausted during your research project. All items currently in stock must be replaced, so include replacement costs. Expendables include items such as traps, microscope slides, test tubes, glassware, aerial photography, and electronic data.
   c. **Operational Expenses.** Include cost estimates for data collection including travel, boat rental and other expenses. The use of University vehicles and boats requires approval by the Field Trip Coordinator and the Department Chairperson, or the research institute or center director with oversight over that vehicle.
   d. **Document Preparation.** Include cost estimates for all aspects of preparing the proposal and thesis, including the cost of having the final document bound. These costs are born by the student alone.

9. **Budget Justification.** This is a brief statement explaining why each element of the budget is necessary to accomplish the research.

10. **Literature Cited.** This section includes the complete citation for each article referenced in the proposal in the format of the Format Journal you have selected.

11. **Biographical Sketch.** The vitae must be 2 pages or less in length and should include five sections: 1) name, present address, contact information, and date; 2) Professional preparation including degrees listing most recent first; 3) Appointments to employment positions, listing most recent first; 4) Publications listing most recent first; and 5) Synergistic Activities, e.g. professional associations, presentations, professional activities, or any other relevant service.
After the proposal is completed, i.e. it is written well and formatted correctly, a draft copy must be submitted to the chair of the graduate advisory committee, and formally presented to the committee. This presentation will clarify objectives, justification, methods, logic, of the proposed research and provide project orientation. The student and the graduate advisory committee must plan the timing, location, and format of the Thesis Proposal presentation. All members of the committee should be present.

Writing a successful proposal may require many drafts prior to approval by the entire advisory committee. Starting this process early is strongly advised. After the proposal meets the committee chair’s approval, each of the remaining committee members should be provided a copy for review. After all requested changes have been made and the committee is satisfied that all aspects of the proposal are in order, the final Thesis Research Proposal must be delivered to the committee chairperson for his/her signature and then to the rest of the committee and Program Coordinator for signatures.

Once all signatures are obtained, make copies to distribute to all members of the graduate advisory committee, and to the College of Science and Engineering Dean’s Office (Academic Advisor). Students must take this process into account when planning their research schedule.

Format of Research Proposal
Make all narrative material of the thesis proposal clearly understandable to the reader through careful, well-organized writing, meaningful figures and tables, and adequate utilization of references. Several publications available in the TAMU-CC library answer specific questions regarding the style of scientific writing, including the Council of Science Editors (CSE) Style Manual, the United States Government Printing Office Style Manual, and others. No corrections of letters or figures should be visible on the final copies.

When writing the thesis proposal and thesis, follow the general format and style for submitting manuscripts (“Guide/Instructions for Authors”) of a respected scholarly journal in the field of your research thereafter referred to as the “Format Journal”. However, you should not follow the final style of journals such as the use of double columns on a text page, literature citation methods other than the name-date system, etc., nor can the typed manuscript duplicate every printing technique. Do not follow the journal's “Instructions to Contributors” except with regards to formatting headings and subheadings, figures and tables, figure and table captions and text callouts, abbreviations, etc. These instructions are primarily for the convenience of the editors and printers of the journal and do not necessarily apply to the format of thesis proposals or thesis manuscripts.

The journal that you choose as the Format Journal for your graduate manuscript should be readily available in the TAMU-CC library. Your committee must approve your Format Journal choice before you begin to write the manuscript. It is usually a good idea to use the same Format Journal for both the proposal and final manuscript.

Prepare the manuscript using styles in your word processor. Styles allow you to reformat the document quickly. The font should be 10 or 12 characters-per-inch (cpi) type size with a plain book-type font such as Helvetica or Times New Roman, not some unusual font. Follow your Format Journal in italicizing or underlining scientific nomenclature, foreign words, abbreviations and titles. When underlining a word, use a continuous underline; do not leave a space in the underline.
between letters. Separately underline each word of a multiword term, leaving a gap between adjacent words. In general, double-space your thesis proposal and thesis manuscript. The exceptions to this rule are for quotations exceeding six typed lines (inset and single-space these) and footnotes (which you should avoid). Figure and table captions should also be single-spaced. One line should separate a table caption from the table header and two lines should separate any embedded figure or table from text on the same page. Number all pages in the thesis proposal or thesis manuscript except the Title and Approval pages. Number the preliminary pages of the thesis proposal with lower case Roman numerals. The Abstract page is the first numbered page; it follows the Title and Approval pages and is numbered iii. The style and format for all headings and subheadings in the thesis proposal and thesis manuscript should follow the standard practice of the Format Journal. Start each major heading (i.e., Methods, Study Area, Results, Discussion, etc.) on a new page. Subheadings should fall naturally within the text, but should never appear alone as the last line on a page (“orphan”). If a subheading is the last line of text, start it at the beginning of the next page.

Tables and figures, regardless of size, may appear on separate pages or within the text itself. Place them in the manuscript as close as possible to their first reference in the text (generally the page on or immediately following the first reference). Make sure that figures and tables are relevant and useful to the reader, and use as many as are necessary to fully report on the results of your research. If a figure or table is relevant, but represents ancillary information or “raw” data, include in an appendix rather than in the main text of the manuscript. If you place tables or figures in landscape format on a page, the top of the table or figure should be on the left side. Give each table or figure a number and caption, and transcribe these exactly on the List of Tables or List of Figures page; if a figure or table caption is more than one sentence, then put only the first sentence into the list. Make captions as concise as possible, but clearly describe the content of the figure or table. Follow exactly the format and style for figures and tables prescribed by the Format Journal.

Construct tables using the “Table” function found in all word processors. Titles for tables must appear on the same page as the table, and should be placed above the table. Make horizontal rules mimic the Format Journal. Vertical rules should not be used. If a table is more than one page long, there should be no closing line on the first page and the second page of the table should have a caption reading “Table #. Continued.” Multi-page tables should always begin on a new page; in other words, the first few lines of a multi-page table should not appear embedded within the text. Use the caption style of your word processing program for figures, which usually places the caption below the figure.

Footnotes should not appear within the regular text of the manuscript (they are permissible as explanatory notes in tables) except in rare circumstances. If they are absolutely necessary and the Format Journal permits their use, follow the journal format exactly. Cite all references to the literature in the text using the name-date system which is the method most widely used in the sciences, e.g., Stilt (2000) or (Heron, 1995; Seagull 1996; Seagull and Plover, 1996). Choose a Format Journal that uses this system. Do not cite sources by number, i.e. (1). If you use or adapt a figure from another author, cite the source in the figure caption. Generally, follow the format in the Format Journal when you develop the Literature Cited section. Use the same system of abbreviations, punctuation, underlining, and italics as the Format Journal. There is one exception

This handbook is intended to be read in conjunction with the Graduate Catalog: http://catalog.tamucc.edu/index.php and the College of Graduate Studies Handbook http://gradcollege.tamucc.edu/current_students/masters_students.html.
(mainly applies to chemistry Format Journals): if the Literature Cited section of your Format Journal does not list the title of an article, make sure that you include it to enhance the usefulness of your citations to readers.

** Travel award from Elite Program

Also include a section entitled "Budget Justification" that describes in detail each line in the budget.
The CMSS Thesis Requirements
Students will complete a study of the accepted standards of scholarly ethics and scientific integrity. The master thesis is a book-length, formal document that argues in defense of a particular subject. A thesis highlights original contributions. Once data collection and analysis are completed, the research should be organized into a meaningful format and explained in a written narrative. The written narrative follows the style and format standard to scientific papers.

Thesis research will not always go according to plans. Students must be prepared to adopt new methods of data collection or analysis if necessary in consultation with the graduate advisory committee. Students should plan to take advantage of any opportunities to pursue side projects, as time and resources permit, to enrich understanding of the research topic.

The College of Graduate Studies Master’s Student Handbook outlines the guidelines and requirements for formatting the thesis. Templates for the title page, copyright page, and committee member page are on the Graduate School Forms webpage: http://gradcollege.tamucc.edu/current_students/doctoral_dissertation.html. In addition, the College of Graduate Studies holds regular dissertation/thesis formatting workshops. All graduate students are encouraged to attend.

CMSS students may choose between two models for organizing the thesis content: 1) the traditional model, and 2) the journal manuscript model. The “traditional” model presents the thesis research content in a single, cohesive manuscript. Information is presented sequentially and no section stands alone as a publishable document. The “journal manuscript” model presents thesis research as one or several discrete article(s), each appropriate for submission to a journal, bound together as the thesis document. In the journal manuscript model, information may be repeated as necessary between articles so that each can stand alone as an academic work. The journal manuscript format must also include an overarching introduction, a summary/conclusions section that brings the entirety of the research into context, and a literature cited section that encompasses the entirety of the manuscript. Regardless of whether the traditional or journal manuscript model is chosen, the entire document must be submitted in one format style. In other words, in the journal manuscript model, even though it is likely that articles will be submitted to several different journals, the entire thesis must be presented in the style of only one journal. Headings and subheadings, punctuation, reference citations, and other details should follow the selected Format Journal guidelines with few exceptions.

When the draft is ready, submit it to the chair of your advisory committee. Submit the draft as if it were the final – make it as perfect as possible with respect to writing and grammar, punctuation and spelling, journal formatting requirements, and with all figures and tables in final format. Be prepared to go through the revision process numerous times before the committee chair is comfortable letting the rest of the committee review the document.

When the committee chair is ready for the document to be submitted to the rest of the committee, enough copies should be reproduced so that each member can have a copy. Ideally, committee members should return the corrected thesis within two weeks of receipt. Students should check with committee members to ensure they have the time to review the document. A final draft

This handbook is intended to be read in conjunction with the Graduate Catalog: http://catalog.tamucc.edu/index.php and the College of Graduate Studies Handbook http://gradcollege.tamucc.edu/current_students/masters_students.html.
delivered to the advisory committee one month prior to the thesis seminar, would allow two weeks before the scheduled final defense/oral examination date for the student to make recommended changes. After the committee has returned the corrected draft, students should review suggested changes with their advisory committee chair, and make the suggested changes, unless the chair directs otherwise. (Note: A request to schedule the defense/final examination must be submitted by the published deadline [http://gradcollege.tamucc.edu/current_students/masters_students.html] on the appropriate form found at [http://gradschool.tamucc.edu/forms.html](http://gradschool.tamucc.edu/forms.html) (Form B).

Students should be prepared to go through the revision process more than once before the committee members are comfortable signing off on the final document. Students should be sure to give their advisory committee chair enough time to review the manuscript and leave themselves enough time to make changes. In other words, students should make sure that they have left ample time prior to deadlines for all members to have adequate time to review the document and for all the changes suggested by the committee to be made. The thesis should be essentially complete before the thesis seminar and final defense/oral examinations. Any member of the graduate committee or the Dean of the College of Graduate Studies can reject the thesis at any stage of the submission and approval process. Rejection of the manuscript can occur for many reasons including (but not limited to):

1. The manuscript does not conform to the required format
2. The manuscript is messy, poorly reproduced, or contains grammatical or spelling errors
3. The manuscript describes scientific data inconsistent with the research project approved in the thesis proposal
4. The paper contains errors, inappropriate analysis of data, erroneous conclusions, or other scientific inaccuracies
5. The paper contains plagiarized work.

After a student has successfully presented the thesis seminar, completed the defense/oral examination, and completed all changes to the thesis manuscript that have been requested by the committee, the Thesis Defense/Final Examination (Form F) report will be electronically routed for signatures and submitted to CGS ([http://gradschool.tamucc.edu/forms.html](http://gradschool.tamucc.edu/forms.html)).

The CMSS faculty expects students to submit thesis research (in proper format) to scholarly journal(s) for publication. If the advisory committee chair or other person(s) including other faculty or scientists from funding agencies, etc., made a significant contribution to the research or writing of the manuscript to be submitted, then the person should be listed as a co-author on the published article. The student and the advisory committee Chair should agree on the order of authorship. Seriously consider co-author status if a person:

1. Supported the work through a grant that was authored by them
2. Did a significant portion of field or laboratory work
3. Contributed materially and intellectually to the research
4. Contributed to the writing

In all cases, acknowledge the chair of the advisory committee, other members of the graduate advisory committee, other people that offered assistance and TAMU-CC in the publication. It is
courteous to acknowledge persons, who assisted in any major way including moral support, lab/field assistance, and of course, any source of financial assistance.

**Thesis Seminar & Final Defense/Oral Examination**

The comprehensive exam must be passed and courses in the plan of study completed with a GPA of 3.0 or greater before the thesis defense/final examination will be scheduled. Once the thesis is completed and approved by the advisory committee, the results of the research must be presented orally and publicly. The thesis defense/final examination must cover, but is not limited to, the thesis. The defense must be scheduled for a minimum of six weeks prior to graduation. The seminar should be scheduled and completed prior to the final defense/oral examination. The final defense/oral examination usually takes place immediately following the seminar, but it can be scheduled on a separate day if necessary to accommodate the schedules of committee members.

Subsequent to the thesis defense/final examination, and only after all changes to the thesis manuscript requested by the committee have been made, the student will submit an electronic copy of the thesis, no later than four weeks prior to graduation, to ProQuest/UMI as a single PDF file (see CGS Doctoral Student Handbook for detailed instructions).

Students not completing all requirements of the Final Thesis Defense by the end of the semester, such as turning in an approved final draft after published deadlines, will receive a grade of In Progress (IP). The student must register for the same course in the subsequent semester, paying all the appropriate tuition and fees, to receive a final grade for the course.

After your **Thesis Defense & Final Examination Report** (Form F) is submitted and all requested changes have been made, you can submit your thesis electronically.

**Thesis Seminar**

The Thesis Seminar is a formal oral and visually supported presentation of the results of the research or of some pertinent aspect of the research. Although it will generally be longer than a paper presented at a scientific meeting, it should be similar in format and design. The defense should review parts of the thesis including the background and relevance of the research, the methods, the results, and the conclusions. Professional quality visual aids must complement the oral presentation. As a general rule, the oral presentation should last about 45 minutes and at least 15 additional minutes should be allowed to answer questions at the end.

Students must prepare and submit a formal announcement of the thesis seminar to their committee chairperson for approval at least two weeks prior to the seminar date. It is the student’s responsibility to contact each committee member and arrange a time and place for the event. All committee members must attend the seminar. The student is responsible for posting the seminar notice as an e-mail to all appropriate listservs at least one week prior to the seminar date. Email a copy of the seminar notice to the College of Science and Engineering Dean’s Office (Academic Advisor) and CMSS Administrative Assistant.
Final Defense/Oral Examination

The purpose of the final defense and oral examination is to allow advisory committee members to gauge the scope of the student’s understanding of the principles and significance of the discipline of the thesis research. It complements the qualifying examination, which gauged overall knowledge in the field, by allowing a more detailed assessment of specific knowledge as it applies to the thesis research. The exact format and scope will vary among students depending on both their advisory committee and the nature of their research.

The graduate advisory committee will decide whether a student has passed the final defense and oral examination. Regardless of whether the student passes or fails, the committee will discuss with the student their assessment of the student’s performance. If a student fails, the exam may be retaken only once, and only after at least four months have passed.
Format of the Thesis Seminar Notice

(Note: Time, date and room are examples only)

THESIS SEMINAR NOTICE
COASTAL AND MARINE SYSTEM SCIENCE PROGRAM
DEPARTMENT OF PHYSICAL AND ENVIRONMENTAL SCIENCES
TEXAS A&M UNIVERSITY-CORPORUS CHRISTI

SUBJECT: Official Title of Your Thesis

SPEAKER: You A. Student

MAJOR ADVISOR: Advisor’s Name

DATE: [Insert Day, month date, year]

TIME: 0:00 a.m./p.m.

PLACE: Building
       Room

ABSTRACT

The abstract of your thesis or graduate project should appear here (shortened version if necessary). An abstract of 50-200 words length is recommended for inclusion in the Graduate Seminar Notice.

[NOTE: Students should post this notice electronically to faculty members and graduate students involved in the CMSS and other graduate programs via the cmss-list, scitech-list, escifac-list, and escistu-list listservs. Ensure you email a copy of the announcement to the College of Science and Engineering Dean’s Office (Academic Advisor) and CMSS Administrative Assistant.]
Appendix 1: CMSS Program Application Checklist

☐ Complete the Texas Common Application and submit the application fee. Online applications are preferred.

☐ Submit an essay of not more than 1000 words describing educational backgrounds, career interests, goals and challenges. Include any relevant supplemental materials such as publications or resumes of relevant experiences, and contacts made with professors in the CMSS program.

☐ Request 3 letters of evaluation/recommendation.
  - You should request evaluations/recommendations from individuals who are familiar with your academic achievement and potential and provide them with the required evaluation forms.
  - If you have been out of school for a number of years and are unable to contact former professors, you may request evaluations/recommendations from people such as employers who are familiar with you and who can comment on your potential to succeed in the program.
  - Completed evaluation/recommendations should be signed over the flap of the envelope by the person completing the form/letter and be mailed directly to CGS.

☐ Request official transcripts documenting all senior-level post-secondary institutions you attended. Transcripts must be sent directly to CGS. An official statement of the award of the degree or diploma is required for each degree completed.

☐ Request that the required test scores (GRE and/or TOEFL) be sent directly from the Educational Testing Service to CGS (Code 6849)
  - GRE and TOEFL scores must be not more than 5 and 2 years old, respectively
  - International graduate students seeking assistantships must also obtain “English Proficiency Certification”

☐ Apply separately to College of S&E for financial assistance.

☐ Priority deadlines are:

Appendix 2: CMSS MS Program First-Year Checklist

- Meet with CMSS Program Coordinator prior to enrolling for first semester classes
- Form Graduate Advisory Committee (GAC) by end of first semester
  - Speak with individual faculty about research interests
  - Committee must include at least 2 CMSS Faculty and a third member
  - Decide on a primary advisor (Committee Chair)
  - Form and meet your committee no later than end of second semester
- Prepare the Tentative Degree Plan with your GAC no later than by end of second semester
  - Leveling coursework
  - Elective coursework
  - Thesis topic
  - Formulate Research Prospectus
- Meet GAC at least annually to update progress

Each time an item is checked off this list, send an email with the date completed to the CMSS Administrative Assistant.
Appendix 3: CMSS MS Program Degree Requirements Checklist

I. Coursework

- Leveling coursework (if necessary) as specified by GAC
- Tentative Degree Plan and Research Prospectus approved by CGS and copy to the College of Science and Engineering Dean’s Office (Academic Advisor) by end of second semester
  - Minimum 36 credit hours
  - 24hrs Core Curriculum, including 1 hour CMSS 6102, 2 hours ESCI 5203, 12 hrs of core courses, and 9 research hours
  - 3.0 minimum GPA
  - Research Prospectus (2-5 pages) developed with GAC
  - Final Degree Plan for signature approval to Dept. Chair, College Dean, and CGS no later than before census day (12th class day) of the semester prior to the graduating term.
  - Deadline to apply for graduation is the last day of classes in the semester prior to graduation.

II. Research Proposal

- Independent, detailed, original, systems-based inquiry
- Research Prospectus presented to committee and submitted to CGS by end of the second semester (2-5 pages)
- Thesis Research Proposal
  - Modified from Research Prospectus with GAC input
  - Submit draft to Committee Chair for approval
  - Present to GAC for approval signatures
  - Signed version submitted to College Dean; Copies to College Advisor, CMSS Administrative Assistant, and GAC members
  - Should be approved by end of second year of graduate study

III. Thesis

- Data collection and analysis completed
- Choose format and prepare according to guidelines
  - Multiple iterations of editing
  - With Chair approval, provide copies to GAC at least 1 month prior to final defense
  - Committee returns corrected versions within 2 weeks
  - Review and incorporate suggested changes along with Chair
  - Additional review by GAC may be required
- Submit final corrected version of Thesis to CGS following successful defense
  - See CGS Master’s Student Handbook for instructions
- Note: Completion of the CMSS MS is driven by the thesis as a product of research, rather than by external factors or commitments

This handbook is intended to be read in conjunction with the Graduate Catalog: http://catalog.tamu.edu/index.php and the College of Graduate Studies Handbook http://gradcollege.tamu.edu/current_students/masters_students.html.
VI. Thesis Defense

- Must be registered for credit for semester in which the final defense takes place
- Apply for graduation in College of Science and Engineering Dean’s Office (Academic Advisor) by published deadline. The student must complete all requirements for the degree at least three weeks prior to the end of the semester in which the degree will be conferred.
- Contact GAC to schedule Thesis Seminar and Final Defense
  - Must be held at least six weeks prior to graduation
- Submit formal seminar announcement to committee chair at least 2 weeks in advance
- Schedule rooms for seminar and defense
- Post announcement to relevant Listservs at least 1 week in advance
- Email copy to College of Science and Engineering Dean’s Office (Academic Advisor)
- Present Thesis Seminar and stand for the Final Defense
- Complete all requirements for the degree at least three weeks prior to the end of the semester in which the degree will be conferred.

Notes:
Tracking progress toward the degree is very important and the responsibility of the CMSS Program Coordinator. Each time the student has accomplished a milestone on this list, the student should send an email with the date completed to the CMSS Administrative Assistant.
