

Curriculum Vitae

Patrick D. Larkin, Ph.D.

Department of Physical & Environmental Sciences
Texas A&M University-Corpus Christi
Corpus Christi, TX 78412
Patrick.larkin@tamucc.edu
www.tamucc.edu/~plarkin
(361) 825-3258

Education

PhD, Biochemistry, Texas A&M University, August 1999

BS, Biochemistry, University of Iowa, August 1989

Experience

Associate Professor of Biochemistry Department of Physical and Environmental Sciences, Texas A&M University-Corpus Christi, Corpus Christi, TX, 2006-present

Biochemistry Laboratory Coordinator, Dept. of Physical and Environmental Sciences, Texas A&M University-Corpus Christi, Corpus Christi, TX, 2000-2016

Director, Molecular Instrumentation Core Facility, College of Science & Technology, Texas A&M University-Corpus Christi, Corpus Christi, TX, 2007-2013

Assistant Professor of Biochemistry, Department of Physical and Life Sciences, Texas A&M University-Corpus Christi, Corpus Christi, TX, 2000-2006

Postdoctoral Research Associate Norman Borlaug Center for Crop Improvement, Texas A&M University, College Station, Texas, 1999-2000.

Graduate Teaching Assistant, Biochemistry I, Biochemistry I & II Laboratory, Dept. of Biochemistry and Biophysics, Texas A&M University, College Station, Texas, 1998 – 1999.

Graduate Research Assistant, Department of Biochemistry and Biophysics, Texas A&M University, College Station, Texas, 1995 -1998.

Graduate Research Fellow, Plant Biotechnology Department of Biochemistry and Biophysics, Texas A&M University, College Station, Texas, 1993 -1995

Research Associate, E.I. DuPont de Nemours Co., Plant Biotechnology Laboratory, Ames, Iowa, 1990 - 1993

Research Assistant, Department of Infectious Diseases, U.S. Veteran's Affairs Hospital, Iowa City, IA, 1989-1990.

Undergraduate Research Assistant (senior thesis) Department of Biochemistry, University of Iowa, Iowa City, IA, 1988-1989

Resident Assistant, Hillcrest Residence Hall, University of Iowa, Iowa City, IA, 1987-1989

Laboratory technician, Department of Psychology, University of Iowa, Iowa City, IA, 1986

Appointments

Graduate Faculty, Chemistry, Texas A&M University – Corpus Christi, 2017-Present

Graduate Faculty, Marine Biology Interdisciplinary Program, Texas A&M University System, 2008-Present

Teaching Experience

Teaching Awards

Most Dedicated Professor Award (2004), Alpha Eta Delta Honor Society

Finalist, *Excellence in Teaching Award* (2006), Texas A&M University-Corpus Christi

Finalist, *Digital Innovator of the Year Award* (2019), Texas A&M University-Corpus Christi

Courses taught

Biochemistry I (CHEM 4401)

Biochemistry II (CHEM 4402)

Biochemistry I laboratory (CHEM 4101)

Biochemistry II laboratory (CHEM 4102)

Medicinal Chemistry/Pharmacology (CHEM 4320)

General Chemistry I (CHEM 1311)

Physiological Chemistry laboratory (CHEM 1106)

Senior Chemistry Seminar (CHEM 4292)

Directed Independent Study (CHEM 4696, CHEM 5696, BIOL 5696: 22 student projects)

Molecular Ecology (3-day short course)

New courses developed

CHEM 5321 *Field and Laboratory Methods in Molecular Ecology*

CHEM 4320 *Drugs, Toxins and Natural Products Chemistry*

CHEM 4292 *Senior Chemistry Seminar*

CHEM 4402 *Biochemistry Laboratory II*

Molecular Ecology Short course

Additional undergraduate courses qualified to teach

Organic Chemistry I & II

Molecular Biology

Botany

Introductory Biology

General Chemistry II

Genetics

Plant Physiology

Cell Biology

Graduate courses qualified to teach

Molecular Ecology

Plant Biochemistry

Conservation Genetics

Natural Products Chemistry

Innovation in teaching, course design and technology

Design of mini-course in molecular techniques for applications in ecology

Designed and implemented 3 day course to train graduate students, staff and faculty in use and applications of molecular techniques to ecology. Course involved training in proper handling of

biological samples, DNA extraction, quantification, Polymerase Chain Reaction (PCR), primer design, gel electrophoresis, DNA sequencing and molecular marker analysis.

Design of Green Fluorescent Protein Curriculum for Biochemistry Laboratory

Designed and implemented series of 13 experiments for biochemistry laboratory using green fluorescent protein (GFP, *Aequorea victoria*) as the target molecule. Project involved series of overlapping protocols (DNA sequence retrieval, primer design, PCR, cloning, electrophoresis, ligation & transformation, Restriction enzyme digest, DNA sequencing, molecular modeling, protein expression, purification and characterization) designed to introduce students to theory and practice of biochemistry by following a single molecule (green fluorescent protein) from DNA sequence to laboratory expression, purification and characterization.

Design of Peer-Centered Learning Format for Biochemistry Courses

Converted upper-level biochemistry courses from lecture to *peer-centered* learning model. This format serves several purposes in large lecture sections: (1) lecture period is broken up into mini-lectures that cover specific topics, helping students to stay focused, (2) higher order thinking skills are reinforced through presentation of conceptual problems between mini-lectures, (3) students are allowed time to process information by discussing answers to conceptual problems with a partner in a focused, non-stressful manner, (4) instructor is provided with an opportunity to assess understanding of a specific topic by polling student answers before and after discussion with partners. Required development of concept-based, in-class problems, web-based reading quizzes and teaching style adapted to small group activities.

Design of Case-Based Study Curriculum for Senior Seminar Course

Developed a curriculum for a senior seminar course (CHEM 4292) based upon the principles of case-based learning. This format utilizes realistic scenarios to engage students in problem-solving tasks that require a number of skills, including: teamwork, writing, speaking and critical analysis. Case-based problems, focusing on chemistry, included: global climate change, antibiotic resistance, methamphetamines, oil spills, pollution, and weapons of mass destruction.

Design of Career Development Curriculum for Senior Seminar Course

Developed a curriculum for a senior seminar course (CHEM 4292) that focused on career building skills, including: self-inventory of skills, methods of organizational research, preparation of resume, interviewing, salary negotiation, budget analysis and graduate/professional school preparation.

Creation of Study Guides for Biochemistry and Medicinal Chemistry Courses

Created study guides to accompany three courses: *Biochemistry I* (CHEM 4401), *Biochemistry II* (CHEM 4402) and *Drugs, Toxins and Natural Products Chemistry* (CHEM 4490). Each guide, which is approximately 50 pages long, consists of questions covering topics from lecture and reading assignments. Guide is designed to reinforce pertinent concepts and details, and prepare students for types of questions to be found on exams.

Genomics & Bioinformatics Curriculum Development

Texas A&M University-Corpus Christi, United States Department of Agriculture-sponsored grant to promote development and utilization of genomics and bioinformatics tools in the undergraduate curriculum. Have Incorporated and modified five existing bioinformatics laboratory modules (BLAST searching, Metabolic and genetic disease database exploration, Protein structure and function analysis, Kinetic database exploration, Multiple protein sequence alignment) into the Biochemistry I laboratory (CHEM4401) curriculum.

Design and Development of Web-based Biochemistry Curriculum and Career aids

Designed and produced personal web site (www.tamucc.edu/~plarkin/) with access to extensive material (syllabi, course notes, exam study guides, laboratory assignments, laboratory data, career guides and links) to be used in conjunction with general chemistry, biochemistry, physiological chemistry, medicinal chemistry and senior seminar courses

Design and Provisioning of Multifunctional Biochemistry Teaching Laboratory

Designed and provisioned biochemistry teaching laboratory on Texas A&M University-Corpus Christi campus for biochemistry, molecular biology, and clinical laboratory science laboratories.

Design and Modification of Physiological Chemistry Laboratory Curriculum

Modified and redesigned physiological chemistry laboratory curriculum (CHEM 1106) for nursing students to emphasize practical aspects of general, organic and biochemistry. Introduced new laboratory modules on concentration calculations, molecular modeling and biochemistry.

Instructor - Summer Camp for Applied Mathematics Preparation (SCAMP)

Instructor for seagrass laboratory studying effects of light attenuation on marine plant growth as part of a USDA-sponsored science and mathematics camp for incoming freshmen.

Professional Development – Teaching

Critical Pedagogy. Texas A&M University - Corpus Christi, January 2015

High Impact Practices. Texas A&M University - Corpus Christi, August 2014

Teaching Naked: Flipping 101 Workshop. Texas A&M University-Corpus Christi, August 2013

Completing College: Rethinking Institutional Action. Texas A&M University-Corpus Christi, August 2012

Digital Natives: Technology Use Among University Students. Texas A&M University-Corpus Christi. January 2012.

Calibrated Peer Review (Chautauqua Short Course for College Faculty). University of California – Los Angeles, June 2006.

Strategies to promote active learning in Chemistry. Texas Center for Excellence in Teacher Preparation (TxCETP). Tarleton State University, February 2003.

Project Kaleidoscope Faculty for the 21st Century Summer Institute. National Science Foundation. Workshop designed for development of innovative strategies for biochemistry and molecular biology education, Snowbird, UT, July 2001.

Developing Higher Order Thinking. Texas A&M Center for Teaching Excellence, April 1998

Classroom Assessment techniques. Texas A&M Center for Teaching Excellence, October 1998

Active Learning. Texas A&M Center for Teaching Excellence, November 1998

Mentoring and Advising

Graduate students – Major Advisor

1. Allyson Girard, MS Chemistry, May 2022. *Assessing the influence of Genotypic Diversity on Seed Production and Environmental Stress Resistance in Texas Seagrasses*

2. Sebastian Rubiano-Rincon, MS Chemistry, December 2019. *An assessment of sulfide intrusion and its relationship to genotypic diversity in the seagrass Halodule wrightii*
3. Michael Barrett, MS Biology. MS Biology, May 2013. *Genetic variation within and among seedbanks of the seagrass Halodule wrightii (Ascherson) from the Texas Gulf Coast.*
4. Krista (Storey) Heidemann, MS Biology, August 2005 *Development Of An Amplified Fragment Length Polymorphism Technique To Assess Genetic Diversity Among Propeller-Scarred Populations Of The Seagrass Halodule beaudettei In Redfish Bay, Texas*

Graduate Committees

1. Michael Kayne, MS Chemistry, May 2020
2. Lauren McGregor, MS Chemistry, May 2020
3. Pedro Ramon, MS Chemistry, December 2019
4. Keegan Granfor, MS Chemistry, May 2019
5. Whitney Roberson, MS Biology, December 2016
6. Margaret Allarilla, Ed.D, December 2016
7. Michelle Lindsey, MS Biology, May 2016
8. Sharon Furiness, MS Biology, August 2012
9. Sarah Matakis, MS Biology, March 2012
10. Stephanie Dovalina, MS Biology, August 2011
11. Sarah McBee, MS Environmental Science, May 2010
12. Leslie Patterson, MS Biology, December 2009
13. Brendan Briggs, MS Mariculture, August 2009
14. Ray Schmidt, MS Biology, August 2008
15. Brooke Stanford, MS Biology, December 2007
16. Vinod Sontineni, MS Biology, December 2007
17. Sridhar Swargam. MS Environmental Science, December 2004
18. Chi Huang, MS Marine Biology
19. Julissa Espinosa, Ed.D
20. Megan Mullis, PhD Marine Biology
21. Brianna Rock, MS Marine Biology

Honors Student Supervision and Theses (Undergraduate)

1. Sebastian Rubiano-Rincon, BS Chemistry 2013. *Genetic variation in a Bermuda population of the seagrass Halodule wrightii.*

2. Hoang Pham, BS Chemistry 2012. *Antibiotic properties of lipoproteins from Bacillus subtilis*

Undergraduate research students

1. Christopher McCormick, BS Chemistry, May 2020. *Metabolomic analysis of seagrass root, rhizome, and leaf tissue*
2. Ashley Hamilton, BS Biology, December 2019. *Analysis of seagrass genotypic diversity at three sampling scales.*
3. Alia Elkhaili, BS Chemistry, December 2016. *Genetic analysis of Halodule wrightii from the upper Texas Gulf Coast.*
4. Anthony Lopez, BS Chemistry, December 2016. *An assessment of clonal diversity at two different sampling scales for the seagrass Halodule wrightii.*
5. Julia Norrell, BS Biology, May 2015. *Genetic characterization of H. wrightii from its northern range on the Texas Gulf Coast*
6. Sebastian Rubiano-Rincon, BS Chemistry, May 2013. *Genetic variation in a Bermuda population of the seagrass Halodule wrightii.*
7. Tabitha (Schonacher) Maloney, BS Chemistry, 2011. *Genetic analysis of seagrass (Halodule wrightii) populations from the Texas Gulf Coast*
8. Sarah Lawson, BS Biomedical Science, 2010 *Mapping genetic structure in the seagrass Halodule wrightii along the Texas Gulf Coast*
9. Mindy Paturzzio, BS Chemistry, 2009. *Development of microsatellite DNA markers for the seagrass Halodule wrightii*
10. Destiny Bean, BS Biomedical Science, 2008. *Development of microsatellite DNA markers for native legume Desmanthus virgatus*
11. Megan Thompson, BS Psychology, 2007, BS Nursing, 2010 *Patterns of genetic variation across land use gradients in Desmanthus virgatus*
12. Stephanie Salinas, BS. Biology, 2006. *DNA sequence variation in inter-transcribed spacer regions from the seagrass Thalassia testudinum*
13. Joyce Parker, BS Biology, 2005, *Genetic variation in the seagrass Thalassia Testudinum from the Texas Gulf Coast*
14. Krista (Storey) Heideman, BS Biology, 2003, M.S. Biology (2005) Texas A&M University - Corpus Christi. *Genetic variation in the seagrass Thalassia Testudinum from the Texas Gulf Coast.*
15. Elizabeth Quevedo, BS Chemistry (2003). *Development of a Randomly Amplified Polymorphic DNA (RAPD) marker system for use with the seagrass Thalassia testudinum.*
16. James Cantu, BS Biology, Univ. Texas at San Antonio, 2003. *Development of a Randomly Amplified Polymorphic DNA (RAPD) marker system for use with the seagrass Thalassia testudinum.*
17. Charles Gailbreath, Texas A&M University - Corpus Christi, 2002. *Development of a Randomly Amplified Polymorphic DNA (RAPD) marker system for use with the seagrass Halodule wrightii.*

18. Trinity O'neal, BS Chemistry, 2002. *Development of a Randomly Amplified Polymorphic DNA (RAPD) marker system for use with the seagrass Halodule wrightii.*
19. Holly Bjorum, BS Chemistry, 2002. *Medicinal properties of plants native to south Texas.*
20. Michael Treanor, BS Chemistry, 2001. *Development of PCR methods for use in the undergraduate chemistry curriculum.*

Directed Independent Study Supervision

Heather Anderson (MS Biology) CHEM 5596: *Mechanism of preprogrammed cell death in cancer cells treated by ionized non-thermal plasma* (Fall 2011)

Miguel Diaz (MS Biology) CHEM 5596: *Catecholamine effects on microbial endocrinology of Vibrio spp.* (Fall 2010)

Miguel Diaz (MS Biology) CHEM 5596: *Oxidative stress and endocrine-like compounds in bacteria* (Fall 2009)

Melanie Franks (BS Chemistry) CHEM 4496: *Chemistry of food surfactants as emulsifying agents* (Spring 2004)

Alexis Galvan (MS Biology) CHEM 5596: *Chitin utilization in the marine bacterium Vibrio furnissii* (Spring 2008)

Christine Gonzalez (MS ESCI) CHEM 5596: *Biochemistry of inborn errors of metabolism* (Spring 2006)

Whitney Roberson (MS Biology) CHEM 5596: *A comparative literary review of seagrass stress response mechanisms* (Fall 2013)

Githzette M. Planas-Costas (MS Biology) CHEM 5596: *Role of SmcR in regulation of transcription in V. vulnificus* (Spring 2013)

Vinod Sontineni (MS Biology) CHEM 5596: *Anesthesia and anesthetic drugs in veterinary medicine* (Spring 2006)

Supplemental Instructor (SI) Supervision

Natasha Villagomez (BS Biomedical Science) CHEM 4401: *Biochemistry I* (Fall 2019)

Dawid Kala (BS Chemistry) CHEM 4401: *Biochemistry I* (Fall 2018)

Dylan Dinn (BS Chemistry) CHEM 4401: *Biochemistry I* (Fall 2016, 2017), CHEM 4402: *Biochemistry II* (Spring 2017)

Academic Advising

Served as Academic Advisor to over 100 undergraduate science majors

Texas Association of Advisors for the Health Professions - 2001, 2002 workshops

Research Experience

63. *Parker, J, *Storey, K, Hardegree, B, Larkin, P. *Evaluation of Halodule beaudettei Diversity Along the South Texas Gulf Coast Using a Randomly Amplified Polymorphic DNA Procedure*. 107th Annual Meeting of the Texas Academy of Science, Schreiner University, Kerrville, TX, March 4-6, 2004, p29.
64. *Parker, J, *Storey, K, Hardegree, B, Larkin, P. *Evaluation of Halodule beaudettei Diversity Along the South Texas Gulf Coast Using a Randomly Amplified Polymorphic DNA Procedure*. Texas A&M System Pathways Research Symposium, Texas A&M University-Galveston, November 2003.
65. *Storey, K, Hardegree, B, Larkin, P. *Use of a DNA Fingerprinting Technique to Assess Genetic Diversity among Populations of the Seagrass Halodule beaudettei Along the Texas Coast*. Sigma Xi Research Symposium, Galveston, TX. November 2002.
66. Larkin, P. *Plant Biotechnology in Agricultural Research*. Summer Camp for Applied Mathematics Preparation (SCAMP), Texas A&M University-Corpus Christi, August 2000

67. Ayres N, McClung A, Larkin P, Bligh H, Jones C, Park W. *Microsatellites and a single nucleotide polymorphism differentiate apparent amylose classes in an extended pedigree of US rice germplasm*. 19th Annual Symposium in Plant Physiology, University of California-Riverside, Riverside, CA. Jan. 14-16, 1997.

Extramural Research Awards

1. Welch Foundation. 2007-2022 (Three-year renewals). *Chemistry Departmental Research Training Grant*. Co-Principal Investigator (\$555,000 cumulative). Award No. BT-0041
2. Texas Sea Grant 2018-19 Grants-in-Aid of Graduate Research *An assessment of sulfide intrusion and its relationship to genotypic diversity in the seagrass Halodule wrightii from the Texas Gulf Coast* . Principal investigator (\$2000)
3. Texas Sea Grant (National Oceanic and Atmospheric Administration) 2008-2011. *Mapping genetic structure in the seagrass Halodule wrightii (shoalgrass) along the Texas Gulf Coast*. Principal Investigator (\$80,000). Award. No. S080033.
4. National Science Foundation. 2005-2008. Major Research Instrumentation Award *Acquisition of an AA Graphite Furnace and Microwave Digester for the Enhancement of Research/Teaching at Texas A&M University-Corpus Christi*. Co-Principal Investigator (\$98,643). Award No. 0421239.
5. Welch Foundation. 2004-2007. *Chemistry Departmental Research Training Grant*. Principal Investigator (\$75,000). Award No. BT-0041
6. National Science Foundation 2003-2006.. Major Research Instrumentation Award *Acquisition of a GC/MS for the Enhancement of Research at Texas A&M University-Corpus Christi*. Co-Principal investigator (\$142,385). Award No. 0321201.
7. Texas Research Development Fund. 2005-2006. *Genetic Evaluation of the Invasive Species Dichanthium annulatum*. Principal Investigator (\$23,600). Funded. No award no. available.
8. United States Department of Agriculture, 2005-2006. Animal and Plant Health Inspection Service. *A Survey of Taura Syndrome Virus Intermediate Hosts in South Texas Shrimp Farms*. Co-principal Investigator (\$50,000). Award No. 2002-38808-03145
9. Texas Excellence Fund. 2005-06. *Use of GIS and DNA Fingerprinting to Assess the Effect of Habitat Fragmentation and Land Use on Genetic Diversity among Native Plant Populations*. Principal Investigator (\$14,166). Funded. No award no. available.
10. National Science Foundation. 2002-2005. Major Research Instrumentation Award. *Acquisition of a digital imaging system to support research and research training in applications of molecular biology*. Co-Principal investigator (\$130,800). Award No. 0216557.
11. United States Department of Agriculture. 2002-2005. Cooperative Research, Education and Extension Service Higher Education Program Grant. *Genomics-Based Curriculum Development for Hispanic Serving Institutions in South Texas*. Co-Principal investigator (\$150,000). Award No. 2001-38422-10973.
12. National Science Foundation. 2001-2004. Major Research Instrumentation Award. *Acquisition of Instrumentation for the Chemical and Biological Characterization of Factors*

Affecting the Distribution of Seagrasses in Coastal Bays and Estuaries. Principal Investigator (\$180,710). Award No. 0116711.

13. Welch Foundation. 2001-2004. *Chemistry Departmental Research Training Grant*. Co-Principal Investigator (\$75,000). Award No. BT-0041.

Intramural Research Awards

1. Texas A&M University-Corpus Christi Research Enhancement Award. *Clonal Architecture and population fitness in the seagrass Halodule wrightii* (2019-21). Principal Investigator (\$5,066).
2. Center for Coastal Studies – Graduate Research and Travel Award *An assessment of sulfide intrusion and its relationship to genotypic diversity in the seagrass Halodule wrightii* (2018-19) Co-Principal Investigator (\$800)
3. Texas A&M University - Corpus Christi Research Enhancement Award. *Assessing small-scale clonal diversity in the seagrass Halodule wrightii* (2017) Principal Investigator (\$5,000)
4. Texas A&M University-Corpus Christi College Research Enhancement Award. *Contribution of clonal diversity to environmental resistance in the seagrass Halodule wrightii* (2015-16). Principal Investigator (\$2,212).
5. Texas A&M University-Corpus Christi College Research Enhancement Award. *Characterization of genetic variation, migration and biodiversity in a population of the seagrass Halodule wrightii* (Ascherson) (2013-14). Principal Investigator (\$3000).
6. Texas A&M University-Corpus Christi College Research Enhancement Award. *Characterization of seed bank genetic variation from the seagrass Halodule wrightii* (Ascherson) (2011-12). Principal Investigator (\$3000).
7. Texas A&M University-Corpus Christi College Research Enhancement Award. *Characterization of novel phenolic- and flavone sulfates from seagrasses* (2007-08). Principal Investigator (\$3000).
8. Texas A&M University - Corpus Christi University Research Enhancement Award. *Estimation of Genetic Variation Among Populations of the South Texas Invasive Species King Ranch Bluestem (Bothriochloa ischaemum)* (2006-2007). Principal Investigator (\$8552).
9. Texas Collaborative for Excellence in Teacher Preparation: *Application of Investigative Case-Based Learning to an Upper-level Chemistry Course* (2006). Principal Investigator (\$6867).
10. Harte Research Institute Gulf of Mexico Environmental Research Lab (GMERL) Special Item Funding. *A Molecular Genetic Evaluation of the Effect of Habitat Fragmentation on the Seagrass Halodule beaudettei* (2005). Principal Investigator (\$5500).
11. Texas A&M University -Corpus Christi. College Research Enhancement Award. *Mapping population genetic diversity among fragmented populations of the native south Texas species Desmanthus virgatus* (2005-2006). Principal Investigator (\$3000).
12. Texas Center for Excellence in Teacher Preparation. *Conversion of a biochemistry lecture course to a peer-centered learning model* (2003-2004). Principal Investigator (\$4700).

13. Texas A&M University - Corpus Christi. University Research Enhancement Award. *A molecular Genetic Evaluation of the Effect of Habitat Fragmentation on the Seagrass Halodule Beaudettei* (2004-2005). Principal investigator (\$8000).
14. Texas A&M University -Corpus Christi. College Research Enhancement Award. *Characterization of metal-binding peptides in the seagrass Halodule beaudettei from South Texas Coastal Bays* (2003-2004). Principal Investigator (\$3000).
15. Texas A&M University -Corpus Christi. University Research Enhancement Award. *A comparison of genetic diversity among highly impacted populations of seagrasses along the south Texas Gulf coast* (2002 -2003). Principal investigator (\$6535).
16. Texas A&M University -Corpus Christi. Title V Strategy to support Best Practices in Advising, Innovative Pedagogues & Outcome Assessment. *Acquisition of Electrophoresis Equipment for an Improved and Updated Biochemistry Laboratory Curriculum* (2002). Principal Investigator (\$1200).
17. Texas A&M University -Corpus Christi. College Research Enhancement Award. *Identification and Assessment of Genetic Diversity among Seagrass Populations using a Randomly Amplified Polymorphic DNA (RAPD) Procedure* (2001-2002). Principal investigator (\$4699).
18. Texas A&M University, College Station, Texas. *Plant Biotechnology Graduate Fellowship* (1993 -1995) \$37,000.

Service Experience

Service Awards

Finalist, Texas A&M University-Corpus Christi *Excellence in Service Award* (2011)

Program (Chemistry) Service

Chemistry Alumni Coordinator (2001-present)
Island Days recruiting events (2000-present)
 Chemistry Graduate Admissions Committee (2017-19)
 Chair, Faculty Search Committee (2017)
 Co-Chair, Chemistry Program 5-year review (2015-16)
 Chemistry Faculty Search Committee (2 positions) (2013-14)
 Chemistry Budget Coordinator (2012-13)
 Chemistry Faculty Search Committee (2011-12)
 Chair, Biochemistry Faculty Search Committee (2010-11)
 Chair, Biochemistry Faculty Search Committee (2009-10)
 Visiting Assistant Professor of Chemistry Search Committee (2009)
 Accreditation coordinator - American Chemical Society (2004-06)
 Development of Biochemistry/Clinical Lab Science major track (2008)
 Development of Biochemistry track recruiting program (2007)
 Chair, Organic Chemistry Faculty Search committee (2005).
 Development of Biochemistry major track (2004)
 Development of Chemistry Program recruiting presentation (2004)
 Physical Chemistry Search committee (2003)

Organic Chemistry Search Committee (2001)
Development of recruiting brochure for Chemistry Program (2001)

Departmental (Physical & Environmental Sciences) Service

Promotion and Tenure Committee (2007-present)
Mary & Jeff Bell University Library Liaison (2005-present)
Coastal & Marine System Sciences Search Committee (2014-15)
PENS departmental P&T revision (2012)
Chair, Physical & Environmental Sciences Chair Search Committee (2006)
Information Technology purchasing coordinator (2005-10)
Marine Biologist Search committee (2002)
Chair, Physical & Life Sciences Teaching Effectiveness committee (2001-02).

College (Science & Engineering) Service

College Curriculum Committee (2015-17)
Faculty Senator (2011-15)
Co-author, College Promotion & Tenure Policy (2012-13)
Core Laboratory Coordinator Search Committee (2012)
Director, Core Molecular Instrumentation Facility (2007-13)
Marine Biology Faculty Search Committee (2011-12)
Marine Biology Faculty Search Committee (2010-11)
Instructor, Core Facility mini-course in molecular techniques (2007-10)
Chair, College Scholarship committee (2009-10)
Clinical Laboratory Science Faculty search committee (2009-10)
College Scholarship Committee (2008-10)
College Research Enhancement committee (2007-09)
Special Programs (Undergraduate Research) Advisory committee (2008)
Instrumentation Coordinator Search Committee (2008)
Biomedical Sciences Neuroscientist search committee (2007)
College of Science & Technology Library Liaison (2004)
College of Science & Technology Dean's Search Committee (2005)
Harte Research Institute Library resources committee (2005)
Designed, filmed, edited and produced promotional video for College of S&T (2002-03)
Harte Research Institute laboratory design committee (2002)

University Service

Graduate Council (2020-22)
Merit & Equity Task Force (2017-18)
Undergraduate Council (2017-18)
Speaker, Faculty Senate (2014-15)
Deputy Speaker, Faculty Senate (2012-14)
Provost's Select Committee on Faculty Merit & Equity (2015)
Search Committee – Executive Vice President for Finance & Administration (2015)
New Faculty Orientation, committee member and host (2014)
Information Technology & Distance Education Committee (2014)
Staff Council, *ex officio* (2014-15)
Council of Principal Investigators and Research Administrators, *ex officio* (2014-15)

Provost's Leadership Team (2014-15)
Executive Compliance Committee (2014-15)
Faculty Senate Faculty Affairs Committee (2013-14)
University Calendar Committee (2013-14)
Honorary Degree Committee (2013-15)
Honors Thesis Defense Committee (2013)
Faculty Senate Budget Committee (2011-2013)
Secretary, Faculty Development Leave Committee (2010)
University Research Enhancement Committee (2007-09)
Chair, University Library committee (2006-07)
University Librarian award committee (2007)
Secretary, University Library committee (2005-06)
University Library committee (2001-07)
American Democracy Project (2007)
Recreational Sports Advisory Board (2007–14)
Momentum 2015 Program Expansion Task Force (2005)

Community Service & Outreach

St. Patrick's Elementary School Science Fair, Corpus Christi, TX (2006-present)
What are Clones? Antonio E. Garcia Arts & Education Center (2019)
Texas Seagrasses 101 Coastal Bend Bays Foundation (2018)
What does a Professor Do? Corpus Christi Montessori Middle School (2017)
Marine Science, Washington Elementary School, Davenport, IA (2017)
Panelist, *Science Innovation Night*, Texas A&M University - Corpus Christi (2012, 2014, 2017)
Diocese of Corpus Christi Science Fair, Corpus Christi, TX (2006-2016)
Science Mentor, *International Baccalaureate* program, WB Ray High School (2014)
Chemistry Club Demonstration, Montessori School of Corpus Christi (K5-8) (2013)
The Power and Magic of Plants, Girl Scout Troop 9643/9686, Corpus Christi, TX (2013)
Chemistry Club Demonstration, St. Patrick's Elementary School, Corpus Christi, TX (2012)
Seagrass Genetics & Conservation, Seagrass Festival of Knowledge, Aransas Pass, TX (2012)
What do Scientists Do?, St. Patrick's Elementary Career Day, Corpus Christi, TX (2012)
Seagrass Genetics & Conservation, Seagrass Festival of Knowledge, Aransas Pass, TX (2011)
Water Chemistry and the Environment, Girl Scout Troops 9643/9686, Corpus Christi, TX (2010)
Native Plants on Ward Island, Girl Scout Troops 9643 and 9686, Corpus Christi, TX (2010)
Seagrass Research in South Texas, Corpus Christi ISD Innovation Academy (2008)
Extracting and visualizing DNA, Seagrass Festival of Knowledge, Aransas Pass, Texas (2010)
What do Chemists do? –St. Patrick's Elementary Career Day, Corpus Christi, TX (2010)
Innovation Academy instructor- Laguna Madre Field Station, Corpus Christi, TX (2008)
Chair, Coastal Bend Science Fair Hospitality Committee, Corpus Christi, TX (2002-07)
Coastal Bend Science Fair, Corpus Christi, TX (2001-2005)
Judge, Region IV Texas Academic Decathlon, Corpus Christi, TX (2004)

Media Presentations

KEDT-TV, Biochemistry expert, "*Challenge*" Series Academic Competition (2016)
KIII-TV interview, *Seagrass research with the CCISD Innovation Academy* (2008)
KIII-TV interview, *Ferid Maurad, Nobel Laureate*, Corpus Christi, TX (2002)
